

Internet Link Load Balancing Solution for **Educational Institutions**

AT A GLANCE

The Peplink Balance is a reliable, cost-effective, and full-featured Internet Link Load Balancing solution that caters to a diverse range of educational environments.

The Peplink Balance provides the flexibility to load balance between multiple Internet connections, such as DSL and Cable, for increasing Internet bandwidth, reliability, uptime, while reducing the cost of having expensive leased lines. The user-friendly Web Admin and Reporting Service help you to manage your network easily and intuitively. And with complete and secured VPN Bonding solution, the Peplink Balance is also the best solution for building inter-campus secure networks.

More Internet with Less Budget

Demand for Internet access at Education Institutions has never been higher. Students need to access the Internet and perform online research for projects. Teachers make use of highly interactive websites for updating course-work, or even utilize other Internet media like YouTube for broadcasting lectures. These multimedia rich resources greatly enhance the learning experience, but challenge your IT resources.

The demand for greater Internet performance in the education sector has increased so fast that many schools' Internet connections are now not able to catch up. Thankfully there is a way to bring the classroom to life again with more Internet bandwidth, and at the same time lower your budget!

Enhance Students Learning Experience

The Peplink Balance can help your school to keep up with the increasing Internet bandwidth demand. Just add new low-cost DSL/Cable connections, and the Peplink Balance Multi-WAN Router will utilize all links to route traffic according to your preferences. You can add or remove connections as demand changes, without additional configuration to the network.

Plus, you can optimize your network flow by using its Traffic Manager policies. Now every student can work online more productively!

Save Money without Losing Reliability

Lower your budget immediately by cutting your leased line or any other expensive Internet connections. Buy a Peplink Balance Multi-WAN Router, switch to a combination of low-cost Internet connections, and your Internet expense will be reduced dramatically. In case any link fails, the Balance will automatically reroute traffic to the healthy connections, giving you the Internet reliability your school has never experienced before.

Peplink Balance Multi-WAN Routers

Case Study of Remington College, United States

Enhance your students learning with previously unavailable Internet resources. Easily add new links for more bandwidth to accommodate constantly increasing demand. Peplink Balance also gives you the ability to reserve bandwidth for teachers and limit bandwidth usage for students.

- A career college that offers degree and specialized diploma programs for working adults.
- Remington College has 19 campuses across the United States.
- Looked for solution to perform load balancing in order to maintain Internet continuity.
- Deployed **19 Balance units, one in each location, to provide reliable Internet services** across its campuses.
- Winning factors include their positive experience from successful trial, ease-of-use of the products, and that Peplink **works as advertised**.
