

# How to Enable Reporting Service?

## Introduction

Peplink Reporting Service provides traffic statistics reports of your network performance drawn from live and historical data. It is a free (and optional) service to monitor the network(s) for all your Balance devices.

## **Post Data**

- 1. Open the Balance admin page and go to **System -> Reporting Server**.
- To use the default Peplink reporting server, select Yes in the Post Data to Server field. Save and apply the changes.

# **Register a Report Account**

Before using reporting service, you need a valid user account on reporting server. As a new user, please follow the steps below to register:

 Click on the *create a login* link on the Balance admin page or go to Peplink reporting server (<u>http://report.peplink.com</u>) to *Register Report Account*.

User Report	Balance Reporting Ser	ver
Username		
Password		
	Register Report Account	Forgot Password

- 2. Enter your detailed user information on the *Account Registration* page.
- 3. An e-mail will be sent to your e-mail address and follow the instructions in your e-mail to activate your account.

# **Update Balance Device(s)**

- On the Balance admin page, *specify* your *User Account* registered and click *Update*. It will associate this Balance with the specified user account on the server.
- 2. If you have more than one Balance device, you need to login to the admin page of each Balance device, and update your account on the Reporting Server Registration window.

## **View Reports**

1. Login to Peplink reporting server (<u>http://report.peplink.com</u>). Your management devices list will be displayed on the interface.

Note: No Balance device is seen when log in with a brand new account.

	PeP	Link Balance Reporting Se	erver		
our managed Pe	PLink Devices				
erial Number	Description	PePLink Product	Reports		Remove
824-1A2B-3C4D	Office1	PePLink Balance 200	Live	Historical	
824-1234-ABCD	Office2	PePLink Balance 700	Live	Historical	
824-ABCD-1234	Office3	PePLink Balance 380	Live	Historical	

2. To display individual device statistics, click **Statistics** next to the selected device. You can view **Live** and **Historical** traffic statistics for both inbound and outbound by WAN link and standard protocol.

The illustration below shows a historical weekly report of a Balance 710 device:
